Our Guarantee

We will replace once, at one-half the original price, all roses, shrubs, shade trees, and evergreens which fail to grow through the first growing season, provided they have received proper care. (No other plants guaranteed.)

All plant failures must be reported by September 1.

Labor for planting of replacements is charged for on the same basis as a new planting.

NOTICE

TO OUR OUT-OF-TOWN CUSTOMERS
WE DO NO SHIPPING.

All nursery stock is sold at the nursery.

The nursery is open every day including Sunday and holidays — except July 4th.

Prices in this catalog subject to change without notice.

LAWN GRASS SEED

MIRACLE GREEN, Super Blend.

100% perennial seeds, with an extra high amount of Kentucky Bluegrass for permanent lawns.

1 lb.\$1.49

GOLF BRAND (Northrup, King)

Top-quality blend of perennial grasses.

1 lb.\$1.39

5 lb. 6.75

FORE (Northrup, King)

Quality blend of perennial grasses including Kentucky Blue Grass. Grows in sun or shade.

1 lb.\$1.19

5 lb. 5.75

SHADY PLACE (Northrup, King)

A balanced blend of fine leaved perennial grasses.

1 lb.\$1.15

CLEVELAND'S MIXTURE

Contains in addition to Blue Grass, creeping fescues, bent and clover.

1 lb.\$1.35

KENTUCKY BLUE GRASS

Recommended for lawns in northern states. A vigorous grower in sun and in rich soil.

1 lb.\$1.19

MERION BLUE GRASS

A new improved strain of Kentucky Blue Grass. Exceptional ability to hold its green color in hot weather, and stands closer mowing.

1 lb.\$2.95

WHITE DUTCH CLOVER

Good addition to lawn seed. Adds nitrogen to the soil. Thrives best under cool moist growing conditions in fertile soils, with plenty of lime.

1 lb.\$1.39

CREEPING BENT ASTORIA

Very fine, rich green leaf blades, spreads by underground runners. Does well in sun or shade.

1 lb.\$1.55

LAWN CARE

Seeding should be done in spring or early fall. All perennial grass seeds are best. Merion Blue Grass is far superior in hardiness, heat and drouth resistance. One pound will cover twice the area of other seeds—it's well worth the extra cost.

Keep soil wet during seed germination.

A high nitrogen fertilizer should be used at least twice a year on lawns.

We recommend special long lasting lawn fertilizers such as Turf Food, or Northrup King Lawn Food, applied about 2 lbs. to 100 square feet.

Lime added once a year will help make a hardy green lawn.

Use Pax, to kill crab grass seed, spring and fall.

INSECTICIDES AND FUNGICIDES

We carry a complete line of ORTHO and ACME PRODUCTS including Rose Dust, Vegetable Dust, All Purpose Dust and Sprays, Fruit Tree Sprays, Crabgrass Killers, Weed Killers, etc.

GARDEN TOOLS AND SUPPLIES

We carry TRU-TEMPER, AMES, WISS and SEYMOUR SMITH tools. Also flower pots, bird baths, garden stakes, fencing, trellises, lawn sprinklers, garden hose and lawn edging.

BULBS FOR SPRING PLANTING

Tuberous Rooted Begonias

These are among the easiest flowers to grow. They thrive in the shade—in the garden, on the north side of buildings or on a porch in a large pot or planter. The bulbs last for years.

SUNBURST YELLOW, specially selected lemon shade, each \$1.50, 3 for \$3.95

Lilies may be selected from colored pictures at the Nursery.

MADONNA LILIES, imported from France are planted in August or September.

PLANTING OF LILIES

Good drainage is the first consideration; then the preparation of the soil.

Peat or leaf mold should be added, and bone meal—or a special bulb fertilizer.

The depth of planting should be about three times the height of the bulb. That is, if the bulb is three inches high, its base should be nine inches deep.

Lilies require a year round mulch to keep the soil mellow and to conserve moisture.

VEGETABLE PLANTS

F₁ Hybrid Tomato Plants

BURPEE'S "BIG BOY" GIANT HYBRID, 78 days, perfectly smooth, scarlet-red fruits of excellent quality. Many weigh 1 lb. and some 2 lbs. doz. \$1.00

BURPEE'S "BIG EARLY" HYBRID, 62 days, over 7 ounces for the entire season, and some fruits up to one pound—excellent texture and flavor. doz. \$1.00

BALL'S "EXTRA EARLY" HYBRID, 58 days, large fruits, extremely smooth. Highest quality fruit, yield and earliness. doz. \$1.00

BURPEE'S HYBRID, 70 days, outstanding for the quality and rich flavor of its fruits, great producer, average 8 ounces. doz. 85c

FOREMOST HYBRID, medium sized, early. doz. 85c

Tomato Plants

JOHN BAER, 75 days, an old favorite.

MARGLOBE, 75 days, smooth, meaty, globular fruits which ripen evenly and free from cracks.

RUTGERS, 85 days, wilt-resistant, very good quality, ripens from inside out.

PONDEROSA, 95 days, very large, meaty variety, good flavor, but uneven in shape.

JUBILEE, 78 days, a new large orange, smooth, meaty tomato. Less acid than red tomatoes. doz. 65c

YELLOW PLUM, produces a large crop of plum shaped fruits, little acid.

GROUND CHERRY, or Golden Husk tomatoes. doz. 65c

FERTILIZING TOMATOES

Use our special "Tomato Food" when planting, and again at blooming time. This fertilizer is high in phosphorus and potash, producing earlier, more and better testing tomatoes.

Cabbage

DANISH BALLHEAD, round solid heads, crisp, sweet, tender, excellent keeper. doz. 65c

Chives

GRASS ONION, useful for salads and seasoning. each 55c

Egg Plant

BLACK BEAUTY, large oval shaped, smooth dark purple fruit. 3 for 25c

Parsley

PARAMOUNT, very dark green, finely curled. 3 for 25c

Peppers

LARGE BELL, early, deep green, very popular and desirable. doz. 65c

Rhubarb

CHIPMAN'S CANADA RED, reddest of all rhubarb. Can be used all season. According to size. each 75c and \$1.00

WHITE SAIL. New 1957, 3 inch white with slight cream center, 21 inches.

YELLOW AVALANCHE. Brilliant soft yellow, unexcelled for cutting and unsurpassed in beauty.

Each 55c

Chrysanthemums may be selected from colored pictures at the Nursery.

Care of Chrysanthemums

Hardy Mums are very easy to grow. Plants set out in the spring will become large blooming plants 1½ to 2 feet across.

Mums do the best in full sunlight, but may be planted where they get three or four hours of shade.

Pinching out the tips of taller varieties to encourage branching should be done several times—until July 15th. The pinching makes the plants sturdy and bushy.

During the summer the soil around Mums should be cultivated regularly to keep weeds down and to maintain moisture. A well-balanced commercial fertilizer should be applied two or three times during the summer. The plants should be watered well after fertilizing.

Use all-purpose dust occasionally to control insects and foliage diseases.

Mums can be planted at almost any time during spring, summer, or early fall. They can be moved in full bloom to plant in window boxes, or in borders where flowers are needed. One can have a new border overnight by replacing old flowers with fresh blooming Mums.

Marsh Hay

Chrysanthemums and other perennials should be covered with Marsh Hay after the ground freezes in the fall. Hay will be for sale at the Nursery in October and November.

BE SURE TO SEE OUR IRIS BLOOMING IN JUNE

IRIS

Iris should be planted during August or in early September. All varieties may be selected from pictures at the Nursery.

ACCENT. Clean yellow standards with rose-red falls, large and tall. each \$2.00

Guarantee for Roses

Dormant roses bought in the spring which do not sprout within five weeks from time of purchase may be returned for replacement.

Please wrap the roots.

Be sure to plant according to following directions.

Important Directions For Planting Roses

Dig holes for roses 18 inches wide and 18 inches deep. Mix our special "Rose Food" and rich soil or peat with dirt taken from holes. Set roses deep with crown or graft 2 inches below ground level. Fill with mixed soil and hill up 4 or 5 inches. Build a soil basin to hold water.

Unsprouted roses should be soaked in a pail of water one day before planting, and then kept covered with a wet cloth until sprouted. Water every other day until started. Dormant roses take from 2 to 5 weeks.

For better blooms, foliage, color and even better fragrance, use a liquid fertilizer every 15 days all summer.

\$2.00 to \$4.00 each

PLANTING DIRECTIONS FOR EVERGREENS

Dig hole a foot larger and deeper than ball of earth on evergreen. Set tree a little lower than it stood in nursery, leaving the burlap around the ball of earth. Fill around ball with rich soil, pack firmly, and fill hole with water. When settled, fill hole with soil, pack firmly, and leave top of ground covered with loose earth. Water well twice weekly.

Fertilize with our special Evergreen, Tree and Shrub Food.

Guarantee

See page 3
